NCRIC ALPR

NCRIC ALPR

The NCRIC Automated License Plate Reader (ALPR) uses cameras situated on various systems to photograph license plates to translate and store license plate characters into the Palantir database. The database provides systems and areas that may or may not include systems housed by the Vigilant ALPR database.

1. Navigate to NCRIC ALPR by going to   then clicking on "Palantir ALPR" on the right column (it's to the right of the calendar; you may need to scroll right if you don't see the column).
2. Log onto NCRIC ALPR
3. Fill in the ALPR Search information then click Search.
